Education

Izmir Institute of Technology — *Urla, Izmir, Turkey*

B.Sc. in Computer Engineering, *September 2023 – September 2026*, Transfer Student

Izmir Katip Celebi University — *Cigli, Izmir, Turkey*

B.Sc. in Computer Engineering, GPA: 3.28

September 2022 – August 2023

Experience

Jotform — *Urla, Izmir, Turkey*

Frontend Support Engineer
November 2025 – May 2026

- Continued working on Jotform Tables with **React**, **Redux** and **PHP**
- Solved **50+** bug tickets, working with both legacy and recent code.
- Helped my team in integrating **AI** functionalities to Jotform Tables.
- The contributions were taken live on a platform with **35M** registered users.
- Received constant feedback from my mentor.

Jotform — *Urla, Izmir, Turkey*

Frontend Developer Intern
June 2025 – August 2025

- Developed a new feature for Jotform Tables, this feature would allow users to import external files (Excel, CSV) to their existing tables.
- Engineered frontend logic using **React**.
- Successfully implemented **Figma** design wireframes to the codebase with **SCSS** stylesheets.
- Utilized **Redux** and **Redux-Saga** for global state management.
- Improved my soft skills by working with a team of interns, also received extensive mentorship.
- Navigated and contributed to a large-scale enterprise codebase.

Parayuz — *Urla, Izmir, Turkey*

DevOps Engineer
September 2025 – February 2026

- Participated in a grassroots startup environment where we developed a financial assistant application as a team of students.
- Successfully deployed the application combining three services utilizing **AWS EC2**, **Docker Compose** and **nginx**.
- Created a development **Docker** image using **Docker Compose** with hot-reload functionality to speed up development.
- Set up **auto-deploy** functionality for certain **Git** branches using **GitHub Actions** and **shell scripting**.
- Utilized **AWS ECS** to deploy **microservices** with a **load balancer**.
- Wrote **shell scripts** for **CI/CD pipelines**.
- Helped with development work in both the **frontend** and **backend**, using **Next.js** and **Spring Boot** respectively.

gardostech — *Alsancak, Izmir, Turkey*

Junior Software Developer
March 2025 – September 2025

- Worked on the company management app **Krang** following **Agile** practices.
- Built a demo app which utilizes **LLMs** to read and extract receipt data from a photo taken with the device camera.
- Worked with technologies like **Next.js**, **TypeScript**, **Tailwind CSS** for frontend development.
- Implemented a PDF generator on the **Nest.js** backend to generate PDFs from **HTML** templates using **Puppeteer** and **Handlebars**.
- Developed a task management module integrated with other modules from scratch with isolated notifications using groups.

- Revamped the application's notification architecture with the **Nest.js** backend, implemented mention notifications for the task management module.
- Created an in-app messaging module with notifications, utilizing **WebSocket**.
- Worked on **Nest.js RESTful APIs** and the **Prisma** database schema of the application.

Izmir Biomedicine and Genome Center — *Balcova, Izmir, Turkey*

*Software Developer Intern
May 2024 – January 2025*

- Designed an **Android** application for cell counting using image processing with **MATLAB**, **Python**, and **Flutter**.
- Gained experience in applying software solutions to biomedicine.

IZTECH Software Society — *Urla, Izmir, Turkey*

*Frontend Developer
May 2024 – June 2025*

- Built a form application with **Next.js** and **MongoDB** to streamline event attendee management.
- Developed interactive projects, including a password game and a digital card app, using **Next.js**.
- Successfully converted a legacy project which used **React** and **JavaScript** to more modern technologies like **Next.js** and **TypeScript**.
- Collaborated with a team of **10+** developers on an educational app.

Papalagi Team — *Cigli, Izmir, Turkey*

*Developer Team Member
May 2023 – August 2023*

- Developed advanced **C++** skills for use with **ROS** to develop an **UAV** (Unmanned Aerial Vehicle).
- Delivered a seminar on **ROS** to **15+** attendees, showcasing technical expertise and communication skills.

Leadership and Activities

IZTECH Software Society — *Urla, Izmir, Turkey*

*Organizational Co-Leader
September 2024 – February 2025*

- Attracted **800+** new members during a university event, leading recruitment efforts.
- Organized large-scale events, including a welcome party with **300+** attendees and a code night with **50+** participants.

IZTECH Software Society — *Urla, Izmir, Turkey*

*Team Member
October 2023 – June 2025*

- Supported various club activities, contributing to event planning and execution.
-

Skills

My technical expertise encompasses a range of programming languages including **TypeScript** and **JavaScript** for building dynamic web applications, **Java** for **object-oriented development**, **Dart** for creating cross-platform mobile apps with **Flutter**, along with **C**, **C++**, and **Python** for various programming tasks from systems development to scripting. I leverage modern frameworks such as **React** and **Next.js** for front-end development, **Nest.js** and **PHP** for scalable server-side applications, and both **Flutter** and **React Native** for mobile app creation. My workflow incorporates essential development tools and practices, including working within the **Linux** environment, managing code versions with **Git**, using **Redux** and **Redux-Saga** for global state management in **React**, styling interfaces with **Tailwind CSS**, and interacting with databases like **PostgreSQL**, **MySQL** and **MongoDB**, often using **Prisma ORM**. I utilize **Docker** for containerization, deploy applications via platforms like **Vercel**, and have experience with cloud services like **AWS** and **GCP**.
